**Reviewer:**

**Shulembayeva G.K.** doctor of biological sciences, professor department molecular biology and genetics, Faculty of Biology and Biotechnology, al-Faraby Kazakh National University;

**Sadyrova G.A.** doctor of biological sciences, lead researcher «Institute for the Development of Science and Innovative technological education».

**D-47 Determination of petroleum derivatives and heavy metals content in land plants, along with the risk degree assessment in its usage as feed, and the impact of technogenic pollutants on the land plants biodiversity:** monograph/ contributors: Inelova Z.A., Nesterova S.G., Yerubayeva G.K. – Almaty, 2019. – 134p.

**ISBN 978-601-04-4129-3**

The purpose of the research is to determine the content of heavy metals and petroleum derivatives in land plants, assess the degree of risk when using them as feed, and the effect of technological pollutants on the biodiversity of land plants in the Kazakhstan part of the Caspian.

**UDC 574**
