### **Interfaculty KazNU Clean City Event in Eyes of Philosophy Students**

I am the 1-st year student of the Faculty of Philosophy and Political Studies Malika Yelikbayeva.

On February 11, 2015 I took part at the meeting organized by the teachers of the Chair of Foreign Languages for Humanities, the Head of which is Dr. Aisultanova K.A.

Dr. Z.G. Aytasheva from the Department of Molecular Biology and Genetics, Faculty of Biology and Biotechnology, was also invited to the event.

This round table regarding issues of ecology was organized in frame of "**Ainalandy nurlandyr**" project proposed by Dr. G.M. Mutanov, Rector of KazNU.

My presentation designed under the supervision of the English language teacher A.Zh. Kalieva, was focused on ecological issues of our city Almaty. It's of high importance for us, as Almaty is in the top-10 of dirtiest cities of the world. The ways of solving this problem were discussed by students.

Then came a presentation designed by student Artur Kim. It was dedicated to harmful effects of global pollutions on health. Student M. Karmanova has made a report on the apple cultivar "Aport" and reasons of its absence these days.

Dr. Z.G. Aytasheva emphasized in her speech that every person should be involved in pure nature protecting process. We were deeply impressed by her information about Danish "Lejru" Campus which she once visited. There everybody on his own will might give up all modern conveniences and be involved in fishing, hunting, grinding the flour and cooking meals on the fire. In the end she has made a conclusion that ecology of society is in fact lots of personal ecologies. Students lively discussed what do these words mean.

At the end participants enjoyed songs and verses about nature presented by my groupmates of the specialty "Social pedagogy and self-knowledge".

Next month me and my groupmates are going to visit Biomuseum at the Faculty of Biology and Biotechnology.

See pictures attached taken by English language teachers **E.U. Artykova** and **G.B. Almabayeva**.
