In 2016 Department of Molecular Biology and Genetics with KazNU Publishers presented two books dedicated to brilliant scholars of our department. Namely, books on life stories of Prof. Murat Ajtkhozhin (1939-1987) and Prof. Nazira Akhmatullina (born in 1931). Both books are available at the Publishing House of KazNU as well as via internet (<http://magkaznu.com/ru/shop/>). Professor M. Ajtkhozhin was the founder of molecular biology research and the first lecturer of ours in molecular biology. Professor N. Akhmatullina is known for her reading lectures on viral genetics at KazNU.
