Academic course policy

The academic policy of the course is determined by the Academic Policy and the Policy of Academic Integrity of Al-Farabi Kazakh National University .

Documents are available on the main page of IS Univer.

Integration of science and education. The research work of students, undergraduates and doctoral students is a deepening of the educational process. It is organized directly at the departments, laboratories, scientific and design departments of the university, in student scientific and technical associations. Independent work of students at all levels of education is aimed at developing research skills and competencies based on obtaining new knowledge using modern research and information technologies. A research university teacher integrates the results of scientific activities into the topics of lectures and seminars (practical) classes, laboratory classes and into the tasks of the IWST, IWS, which are reflected in the syllabus and are responsible for the relevance of the topics of training sessions and assignments.

Attendance. The deadline for each task is indicated in the calendar (schedule) for the implementation of the content of the course. Failure to meet deadlines results in loss of points.

Academic honesty. Practical/laboratory classes, IWS develop the student's independence, critical thinking, and creativity. Plagiarism, forgery, the use of cheat sheets, cheating at all stages of completing tasks are unacceptable.

Compliance with academic honesty during the period of theoretical training and at exams, in addition to the main policies, is regulated by the "Rules for the final control", "Instructions for the final control of the autumn / spring semester of the current academic year", "Regulations on checking students' text documents for borrowings".

Documents are available on the main page of IS Univer.

Basic principles of inclusive education. The educational environment of the university is conceived as a safe place where there is always support and equal attitude from the teacher to all students and students to each other, regardless of gender, race / ethnicity, religious beliefs, socio-economic status, physical health of the student, etc. All people need the support and friendship of peers and fellow students. For all students, progress is more about what they can do than what they can't. Diversity enhances all aspects of life.

All students, especially those with disabilities, can receive counseling assistance by phone / e- mail bazhan.turebekova@kaznu.edu.kz or via video link in ZOOM

https://us04web.zoom.us/j/75253663208?pwd=3ZpF1kQabydDcEjb1C7CWxuk8b09ML.1

Integration MOOC (massive open online course). In the case of integrating MOOC into the course, all students need to register for MOOC. The deadlines for passing MOOC modules must be strictly observed in accordance with the course study schedule.

ATTENTION! The deadline for each task is indicated in the calendar (schedule) for the implementation of the content of the course, as well as in the MOOC. Failure to meet deadlines results in loss of points.

The performance of tasks, the activity of work in the classroom during lectures, seminars, practical exercises (discussions, quizzes, debates, round tables, laboratory work, etc.) are evaluated. Acquired knowledge and competencies are assessed. Summative assessment - type of assessment, which is carried out upon completion of the study of the section in accordance with the program of the course. Conducted 3-4 times per semester when performing IWS. This is the assessment of mastering the expected learning outcomes in relation to the descriptors. Allows you to determine and fix the level of mastering the course for a certain period. Learning outcomes are evaluated. | | | | |

SUMMATIVE ASSESSMENT RUBRIC CRITERIA FOR ASSESSMENT OF STUDY RESULTS

The written assignment of the PGCE (25% of 100% of the AP)

| Criterion/score | THC | | GCE (25% of 100% of the AF Descript | | _ | |
|---|---|---|---|--|--|--|
| | Great Good | | Satisfactory | Nonsatisfactory | | |
| | 90–100% (27-30 points) | 70–89% (21-26 points) | 50–69% (15-20 points) | 25–49% (8-14 points) | 0–24% (0- 7 points) | |
| Knowledge and understanding theories and concepts course | An "excellent" grade is given for an answer that contains an exhaustive explanation of the question, a detailed argument for each conclusion and statement, is structured logically and consistently, and is supported by examples from the developed classroom topics. | A "good" rating is given for an answer that contains a complete but not exhaustive coverage of the issue, an abbreviated argumentation of the main provisions, and allows for a violation of the logic and consistency of the presentation of the material. The answer contains stylistic errors and inaccurate use of terms. | A "satisfactory" rating is given for an answer that contains incomplete coverage of the questions proposed in the ticket, superficially argues the main points, allows compositional imbalances in the presentation, violations of the logic and sequence of presentation of the material, does not illustrate theoretical points with examples from developed classroom notes. | Incorrect coverage of the questions posed, erroneous argumentation, factual and speech errors, assumption of an incorrect conclusion. | Ignorance of basic concepts, theories; Violation of the Rules for conducting final control. | |
| Application of the selected methodology and technology to specific practical tasks | Complete completion of the educational task, a detailed, reasoned answer to the question posed, followed by solving practical problems of the course; | Partial completion of the educational task, incomplete, sometimes reasoned answer to the question posed with an incomplete solution to the practical problems of the course; illiterate use of scientific language norms in the course. | The material is presented in fragments, with a violation of logical sequence, factual and semantic inaccuracies are allowed, and the theoretical knowledge of the course is used superficially. | Irrational method of solving a task or an insufficiently thought-out answer plan; inability to solve tasks, perform tasks in general form; admission of errors and omissions exceeding normal. | Inability to apply knowledge and algorithms to solve problems; inability to draw conclusions and generalizati ons. Violation of the Rules for | |
| Evaluating and analyzing the applicability of the chosen methodology to the proposed practical task, justifying the result obtained | Consistent, logical and correct substantiation of scientific principles and the applied methodology and technology, literacy, compliance with the norms of scientific language, 1-2 inaccuracies in the presentation of the material are allowed, which do not affect the generally correct conclusions (+ visualization of the results of the substantiation | 3-4 inaccuracies in the use of conceptual material, minor errors in generalizations and conclusions that do not affect the good overall level of task completion are allowed. | Conclusions on the applicability of substantiated scientific provisions are vague and unconvincing; there are stylistic and grammatical errors, as well as inaccuracies in processing the results of a practical decision | The task was completed with gross errors, answers to questions were incomplete, conceptual material and argumentation were poorly used. | The task has not been completed, there are no answers to the questions posed, materials and analysis tools are not used. Violation of the Rules for conducting final | |
