Problems of legal protection of the environment from radiation contamination by the example of the Republic of Kazakhstan, the Russian Federation and the United States of America - Almaty, 2016. - 135 p.

The monograph is a comprehensive study devoted to the study of legal problems of environmental protection from radiation pollution by the example of such countries as Kazakhstan, Russian Federation, United States of America. The paper considers the features of the legal protection of the environment in the case of radiation pollution, taking into account the specifics of the regulation of the safe use of nuclear energy for the environment and human beings. The paper analyzes the conceptual problems of the functioning of the system of state regulation and control bodies. The bases of responsibility for radiation pollution of the environment in a transboundary context are investigated.
