# «The Green Office»

of Educational Institution

Almaty 2015

**Tazhibayeva T.L., Polyakova S.E.** "The Green Office" of Educational Institution: teaching guidelines. –Almaty: Қазақ университеті, 2015. – 36p.

World experience and prospects of implementation of "Green Office" in Educational Institutions of Kazakhstan are considered. Basic provisions of the Concept of "Green Office", the purposes, tasks, structure of "Green Office" of Educational Institution, the information and analytical knowledge base on introduction of "Green Office" are presented.

Strategy of development of the scientific and educational Center for implementation of the principles of "Green Office"; the modern principles of energy saving on the basis of "Green Office" are offered.

Recommendations are made by results of the researches on the subject "Implementation of the principles of "Green Office" in Educational Institutions of Kazakhstan" executed within the joint project of Kazakhstan National Geographic Society (KNGS), Al-Farabi Kazakh National University (Al-Farabi KazNU) and Scientific Research Institute of Ecology (SRIE). The project was carried out on the basis of Department of UNESCO on a Sustainable Development and Departments of Meteorology and Hydrology of the Faculty of Geography and Environmental Management of al-Farabi KazNU.

**Relevance**

Global environmental movement is gaining its momentum every day. The number of companies seeking to unite with nature, the transition to eco-standards not only in production, but also their daily activities, is constantly growing. Therefore, the management concept of companies was created, which allows to reduce the negative impact on the environment. It was called "Green Office" and makes a significant contribution to sustainable development of society.

**Development of society in the direction of improving environmental consciousness - the path to Sustainable Development**
