ACADEMIC COURSE PRESENTATION

Purpose of the course	Expected Learning Outcomes (LO) As a result of studying the discipline the student will be able to	Indicators of LO achievement (ID)
<p>The purpose of studying this discipline is to develop students' theoretical knowledge and practical skills in cost management by answering questions about why costing is performed and what it is used for. This includes the appropriate cost calculation methods and methods, as well as the possibilities of using digital calculation. The student will learn how cost management approaches are designed and implemented in an organization, what impact these approaches have, and how methods are applied to ensure informed short-term decision making under risk and uncertainty using appropriate risk</p>	<p>1. LO 1 - understand how the cost management and transformation model is designed to help businesses achieve and maintain cost competitiveness.</p>	<p>1.1 - understand the essence, goals and objectives, objects and main directions of cost management; 1.2 - identify the activity that causes the change in value. 1.3 - find out why product costs are calculated using different methods for different purposes and for different types of organizations. 1.4 - demonstrate the concepts of JIT, TQM and Kaizen and how they stimulate continuous improvement of products and processes in cost management.</p>
	<p>2. LO 2 - understand the relationship between direct/indirect and variable costs and fixed costs, respectively</p>	<p>2.1 - apply modern methods and techniques in the practice of cost management; 2.2 - use methods for assessing and managing variable costs and fixed costs; 2.3 - Determine the impact of just-in-time (JIT) manufacturing, theories limits (TOC) and total quality management (TQM) on efficiency, stock levels and costs 2.4 - understand the rationale for using ABC as a basis for cost management.</p>
	<p>3. LO 3 - apply marginal productivity and absorption cost methods for profit reporting and inventory valuation</p>	<p>3.1 - understand marginal productivity and absorption cost methods for profit reporting 3.2. - compare budget with actual profits using absorption and/or marginal cost principles. 3.3 - understand how the system process control (ABM) uses process accounting cost (ABC) to increase profitability and customer satisfaction. 3.4 - apply modern methods and indicators for assessing the</p>

management tools.	<p>4 LO 4 - apply standard costing methods</p> <p>5. LO 5 - describe the main types of short-term decisions organizations make when managing costs</p>	<p>4.1. apply modern methods for assessing and managing variable costs and fixed costs;</p> <p>4.2. – identify potential differences and difficulties in calculating the cost of digital products compared to traditional products.</p> <p>4.3 - calculate target costs and target prices and identify methods to reduce significant cost variances.</p> <p>4.4 - value chain analysis</p> <p>5.1 - explain the basic concepts used to make short-term decisions, and the application of appropriate methods to support short-term decisions.</p> <p>5.2 - prepare various types of budgets and discuss budgetary control.</p> <p>5.3 - understand life cycle costing and its implications for marketing strategies.</p> <p>5.4 - determine relevant cash flows and their timing for the entire life cycle of the project, including accounting for taxes, inflation and working capital.</p>

Academic course policy	<p>The academic policy of the course is determined by <u>the Academic Policy and the Policy of Academic Integrity of Al-Farabi Kazakh National University</u>.</p> <p>Documents are available on the main page of IS Univer .</p> <p>Integration of science and education. The research work of students, undergraduates and doctoral students is a deepening of the educational process. It is organized directly at the departments, laboratories, scientific and design departments of the university, in student scientific and technical associations. Independent work of students at all levels of education is aimed at developing research skills and competencies based on obtaining new knowledge using modern research and information technologies. A research university teacher integrates the results of scientific activities into the topics of lectures and seminars (practical) classes, laboratory classes and into the tasks of the IWS, IWS, which are reflected in the syllabus and are responsible for the relevance of the topics of training sessions and assignments.</p> <p>Attendance. The deadline for each task is indicated in the calendar (schedule) for the implementation of the content of the course. Failure to meet deadlines results in loss of points.</p> <p>Academic honesty. Practical/laboratory classes, IWS develop the student's independence, critical thinking, and creativity. Plagiarism, forgery, the use of cheat sheets, cheating at all stages of completing tasks are unacceptable.</p> <p>Compliance with academic honesty during the period of theoretical training and at exams, in addition to the main policies is regulated by the "Policy for the Final course" "Instructions for the Final control of</p>	

the autumn / spring semester of the current academic year", "Regulations on checking students' text documents for borrowings".

Documents are available on the main page of IS Univer .

Basic principles of inclusive education. The educational environment of the university is conceived as a safe place where there is always support and equal attitude from the teacher to all students and students to each other, regardless of gender, race / ethnicity, religious beliefs, socio-economic status, physical health of the student, etc. All people need the support and friendship of peers and fellow students. For all students, progress is more about what they can do than what they can't. Diversity enhances all aspects of life.

All students, especially those with disabilities, can receive counseling assistance by phone / e- mail ainagul.adambekova@kaznu.edu.kz via video link in MS Teams <https://teams.live.com/join/946493686446?p=yOiGZI019ry99wa8>

Integration MOOC (massive open online course). In the case of integrating MOOC into the course, all students need to register for MOOC. The deadlines for passing MOOC modules must be strictly observed in accordance with the course study schedule.

ATTENTION! The deadline for each task is indicated in the calendar (schedule) for the implementation of the content of the course, as well as in the MOOC. Failure to meet deadlines results in loss of points.

INFORMATION ABOUT TEACHING, LEARNING AND ASSESSMENT

Score-rating letter system of assessment of accounting for educational achievements				Assessment Methods												
Grade	Digital equivalent points	points, % content	Assessment according to the traditional system	<p>Criteria-based assessment is the process of correlating actual learning outcomes with expected learning outcomes based on clearly defined criteria. Based on formative and summative assessment.</p> <p>Formative assessment is a type of assessment that is carried out in the course of daily learning activities. It is the current measure of progress. Provides an operational relationship between the student and the teacher. It allows you to determine the capabilities of the student, identify difficulties, help achieve the best results, timely correct the educational process for the teacher. The performance of tasks, the activity of work in the classroom during lectures, seminars, practical exercises (discussions, quizzes, debates, round tables, laboratory work, etc.) are evaluated. Acquired knowledge and competencies are assessed.</p> <p>Summative assessment - type of assessment, which is carried out upon completion of the study of the section in accordance with the program of the course. Conducted 3-4 times per semester when performing IWS. This is the assessment of mastering the expected learning outcomes in relation to the descriptors. Allows you to determine and fix the level of mastering the course for a certain period. Learning outcomes are evaluated.</p> <table border="1"> <thead> <tr> <th>Formative and summative assessment</th> <th>Points % content</th> </tr> </thead> <tbody> <tr> <td>Activity at lectures</td> <td>9</td> </tr> <tr> <td>Work in practical classes</td> <td>27</td> </tr> <tr> <td>Independent work</td> <td>24</td> </tr> <tr> <td>Final control (exam)</td> <td>40</td> </tr> <tr> <td>TOTAL</td> <td>100</td> </tr> </tbody> </table>	Formative and summative assessment	Points % content	Activity at lectures	9	Work in practical classes	27	Independent work	24	Final control (exam)	40	TOTAL	100

Guidelines for performing the SIW 1 Course "Cost Management"

EP Management Eng 3 course

Analytical report " The impact of cost management on managerial decision-making in a company "

To complete the task, it is necessary to select a public company in the Kazakhstan / world market, which has at least 5 years of reporting, refers to large business entities, has an official website covering the results of the company's activities.

To compile an analytical report, be guided by 1) lecture materials, 2) recommended textbooks on the topics of RK 1 (one textbook is enough), 3) the company's annual reports, 4) the company's financial statements, 5) information news feeds reflecting the specifics of the company's development. All references to these sources must be made in the Analytical Reference.

According to the structure, the report should cover the content of the course on RK1 and answer the following questions:

1. The role of the company in the development of the industry\region\country\world market. Reflection in key indicators, charts
2. Describe the main activities in the scheme Reflect in key indicators
3. Describe the structure of the company, presenting the regional structure (if there are representative offices, branches, subsidiaries) and the structure of the parent company. Reflect in key indicators, diagrams
4. Describe the main types of costs
5. Describe the role of cost management in company management. Reflect in key indicators, diagrams
6. Describe the main factors that affect the increase or decrease in costs. Reflect in key indicators, diagrams
7. Make a final conclusion regarding the impact of cost management on managerial decision-making: what factors in this company are determining when making managerial decisions? What external factors can influence decision making? What is the role of the main stakeholders in making managerial decisions? To what extent do costs determine the direction and momentum of a company?

Analytical information should be compiled according to the 50:50 structure (text and analytics in diagrams, diagrams, figures, tables). All data should be consistent, conclusions should be reasoned. Each position must have its own heading.

Evaluation criteria 100 points

Criteria	Scores Max	score in section
Compliance of company selection with criteria - Reporting for at least 5 years - relating to large business entities	1 point for each correspondence	2
References to sources: 1) lecture materials, 2) recommended textbooks on the topics of RK 1 (one textbook is enough), 3) annual reports of the company, 4) financial statements of the company, 5) informational news feeds	1 point for each type of source	5
The role of the company in the development of the industry\region\country\world market. Reflection in key indicators, charts	Reflect in key indicators, schemes Each group of indicators 1 point Each scheme 1 point	10 For indicators 5 For schemes 5
Describe the main activities in the scheme Reflect in key indicators	Each group of indicators 1 point Each scheme 1 point	5
Describe the structure of the company by presenting the regional structure (if there are representative offices, branches, subsidiaries) and the structure of the parent company.	Reflect in key indicators, schemes Each group of indicators 5 point Each scheme 5 point	15
Describe the main types of costs	Reflect in key indicators, schemes Each group of indicators 1 point Each scheme 1 point	10
