

The workshop on cultural science is used for repetition of a training material, the best assimilation and systematization of the gained knowledge. The workshop on cultural science allows to reveal, in what degree students seized knowledge of the basic scientific facts of culturological disciplines, their theoretical provisions, social norms, and also ways of cognitive activity. All subjects offered in a practical work are followed by methodical instructions and the list of educational and scientific literature. Using the sources given in the list, the student can deepen the knowledge in this or that subject.
