**Abstract:** Unlike Christianity and Buddhism, Islam, being one of the three universal world religions, actively penetrates into people's everyday life. The main reason for this is that in Islam the religion and ideology, philosophy, religious organizations and state bodies are closely interrelated. In order to analyze the state of being of interrelations of religion and civil society in Kazakhstan, it is necessary to study Islam and its relations with spiritual culture of the society. According to the Constitution of the Republic of Kazakhstan the religion is separated from the state, i.e. each performs its own function without interfering into each other's affairs. The right of the citizens of our republic to freedom of thinking and faith is based on the Constitution of the RK, Civil Code, Law "On freedom of faith and religious unions in the Republic of Kazakhstan".

Religion in unobscure form poses a question about the sense and specifics of human history, brings forward the idea of all people, enables a concept of a moral personality and conscience. It serves as a way of regulating and orientation of not only external behavior, but also internal world of people, giving a possibility of hope and belief in the Good, Love and Truth. A modern man who is internally weakly linked with one of the currently existing religions is anxious – either he has to lose trust in his own mind or a trust in great prophets, great teachers of the humankind. Irrespective of what will our contemporary will choose, it is clear that religious need is undoubtful. And this is particularly important in the periods of abrupt break of social relations, accompanied by rising uncertainty in future of a man. This is why just after the breakup of the Soviet Union, i.e. after disappointment in the progressive social ideal – "soviet communist future" – people all over followed each other to join different types of religious confessions.

Nowadays in the Western countries, in many temporal Eastern countries, including Kazakhstan, the religion mainly serves as an integrating-control mechanism of civil society. The function of a religion in civil society is to keep the integrity of socio-cultural system, of which it is a part. A number of religious confessions combine religious propagation with economic activities, establishes on the territory of Kazakhstan small private enterprises and firms, promoting development of economy and creation of new workplaces. Mosques conduct charities, render material aid to the most vulnerable groups: handicapped, aged, lonely, and other people. All activity of religious organizations is directed at realization of ideals of peace, tolerance and love towards all human beings regardless of their confessional membership.

Islam is the center of a semantic field of Turkic philosophy. If one is to overcome the Marxist-Soviet thesis that Islam has been imposed to Turks by Arabs, then it is possible to allocate the following aspects of this issue: a) Islam has played a civilizational function in the culture of Turkic people; b) on the basis of Islam the culture of Turkic people in IX-XII centuries blossomed, the Turkic philosophy of this period occupied one of the leading positions in the world philosophical process; c)
