

1.	Introduction: matter and forces.	N _o 1
2.	Matter content of the Universe.	N _o 1
3.	Forces, Grand unified theories.	N _o 1
4.	The weak force.	N _o 1
5.	The strong force.	N _o 1
6.	Grand unified theories.	N _o 1
7.	Experimental possibilities.	N _o 1
8.	Neutrino experiments.	N _o 1
9.	High-energy colliding-beam experiments.	N _o 1
10.	Bubble chambers.	N _o 1
11.	High-energy colliding-beam experiments.	N _o 1
12.	Heisenberg and interaction picture.	N _o 1
13.	Harmonic oscillator using Dirac operators.	N _o 1
14.	Relativistic kinematics.	N _o 1
15.	Centre-of-mass energy.	N _o 1
16.	Mandelstam variables.	N _o 2
17.	The Klein-Gordon equation.	N _o 2
18.	Feynman interpretation of negative energy solutions.	N _o 2
19.	Definition of the cross section.	N _o 2
20.	Cross section evaluation.	N _o 2
21.	Relativistic spin-1/2 particles.	N _o 2
22.	Pauli matrices, commutation relations.	N _o 2
23.	The Dirac equation, α , β and γ matrices.	N _o 2
24.	Solutions of the Dirac equation.	N _o 2
25.	The adjoint Dirac equation and the conserved probability current.	N _o 2
26.	$e^- \mu^-$ scattering. Electron in an EM field.	N _o 2
27.	Scalar field. Complex field.	N _o 2
28.	Trace theorems. $d\sigma/d\Omega$ for the process.	N _o 2
29.	Helicity conservation at high energies.	N _o 2
30.	Virtual photons and the photon propagator.	N _o 2
31.	Real and virtual photons.	N _o 3
32.	The Higgs model.	N _o 3
33.	Compton scattering.	N _o 3
34.	Massive spin-1 particles. Polarization vectors.	N _o 3
35.	Propagator for virtual vector bosons.	N _o 3
36.	Propagator for unstable virtual vector bosons.	N _o 3
37.	Charge current weak interactions. π/K decay to e/μ .	N _o 3
38.	Relation between G_F and g_w . $O(n)$, $U(n)$ and $SU(n)$.	N _o 3
39.	Neutral current weak interactions. Weinberg-Salam model.	N _o 3
40.	Neutral current processes.	N _o 3
41.	An electron in an electromagnetic field.	N _o 3
42.	Charged Current interactions involving quarks.	N _o 3
43.	νq scattering. Charged Pion and Kaon decay.	N _o 3
44.	The Strong Force.	N _o 3
45.	Spontaneous symmetry breaking.	N _o 3
