### ОСОБЕННОСТИ ИСПОЛЬЗОВАНИЯ ИННОВАЦИОННЫХ ТЕХНОЛОГИЙ В УЧЕБНОМ ПРОЦЕССЕ

В статье рассматриваются особенности использования инновационных технологий в учебном процессе. Затрагивая вопрос о содержании термина «инновация», введенный впервые в научный оборот Н. Нурахметовым, автор приводит примеры «побочного» использования инновационных технологий в учебном процессе в условиях современного глобализирующегося общества. В связи с этим в статье обосновывается необходимость личностно-ориентированного обучения, основанного на индивидуальных возможностях студента, его любознательных и творческих способностях, что предполагает использовать в учебном процессе современные инновационные технологии обучения.

Ключевые слова: инновации, педагогическая технология, вебинарная конференция, кейс-стади, социально-профессиональный.

Ashirova A.T., Abdrahmanova Sh. A., Imankulova S.M.

### USING OF INNOVATIVE TECHNOLOGIES IN EDUCATIONAL PROCESS

The article explains the using of innovative technologies in the educational process. On the question of the meaning of the term "innovation", introduced for the first time in the scientific revolution by N.Nurakhmetov, author gives examples of "indiscriminate" use of innovative technologies in the educational process nowadays globalized society. In this regard, the article explains the need for student-centered learning based on individual capabilities of the student, his curiosity and creativity that intends to use in the educational process of modern innovative learning technologies.

Key words: innovation, educational technology, vebinarnaya conference, case studies, socio-professional

#### Introduction

The President of Republic Kazakhstan – N.A.Nazarbaev «Kazakhstan-2050» strategy the already putted example the clearly orientation the priceless value to people the new political course represented. However ,

«Kazakhstan – 2050» measure the new political course for the new Kazakhstan historic the case chameleon strategy. «Kazakhstan – 2050» purpose of this program in the middle XXI century to be the most grew 30 countries . In this strategy the main factor will give, President: «In 2050 years annual kazakh nations – on three tongue spoke experienced, the society free enough assurance. The three tongue necessary statehood on levels – clearly aim putted. The present already chose the society three tongue management worse said specialist demand. The science and stormy already grew on whole sleeve technician represented new example preparation specialist faculty competition information-technological tendencies. Follow this the formation aim in the system will say ready affair-ways the demand diverse time include. Nowadays widely application already found several information scientists «innovation» word already gave: «Innovation – new idea in the expressly the group» or «Innovation – special change». The first time investigator N. Nurakhmetov has given information about «Innovations». Investigator told: «Innovation the formation creation discoveries organizations, management, utilization and their the tangent » work divorce. Innovation knowledge, on technique, on technology, the occupation will show on direction organization.

Innovation – the organization new maintenance, discovery introduction, present action course new examples, from of border number followed in the new qualitative level professional particular act, new result provided new theoretic, program the unitarity technological and pedagogic particular act. The professional formation of system criticized – expressly capacity not restrict formation, the acquisition professional experienced, use on the present cases life, use the society bring.

Innovation – the Latin word «novatio» and through the integration «in» supplement the formation term. On Kazakh language «update, the changes will be, the direction Kazakh tongue instead of help grammatical unit. However, the tracing-paper word innovation must pay with way, in Kazakh language update, accordingly pivot in the change will be in the explanation.

Relatively statement in academics, innovation terms in the nineteenth century wrote meet on scientific research. Foreign economists of the twentieth century scientists (I. Schumpeter) began his work widely acknowledged. Dictionary, but its modern Kazakh language by applying a composition, in the effective use of time will be started in the statement of the XXI century. More precisely say, "innovation" after the term of the message 2010 annual Chapter purely economic category was despite the
